5/10/2021

Issue with the tutorial not mentioning that I need an image, after some investigating, I worked this out and created an image for it. This was for the HealthBar tutorial.

12/10/2021

There weren't many issues with this. There were a couple times when I couldn't play to test, this was just that I forgot a semi colon at the end of some code.

19/10/2021

Again, not really any issues, I'm a little slow at typing code, often finding myself looking back at something I've typed to find a capital letter or semi colon is missing.

2/11/2021

I had an issue where the block I picked up wouldn't move with the player. I looked over the code and video and realised I miss – named something in the code. Correcting the name in the code to the name in the scene fixed it.

9/11/2021

I had some red underlines in the code for 'SetDestination' and 'isStopped', through investigation I hadn't fully typed out NavMeshAgent at the top of the code. That solved the issue.

16/11/2021

No issues when going over code and writing notes.

23/11/2021

I had an issue with a pressureplate script not accepting both the player and a block. I asked for help and Paul showed me how to make the script work as intended.

30/11/2021

Making a flashlight script, I tried making this myself and it didn't work, I looked up a tutorial and that didn't work for me. I asked a friend for some help and we worked out what was wrong.

7/11/2021

Nothing wrong, going over work and checking I have things to hand in.
